

Inspection and test engineer (m/f/d)

Company profile

Stage Tec Entwicklungsgesellschaft für professionelle Audiotechnik mbH develops and manufactures digital sound mixing consoles and audio distribution systems of the highest quality. Since 1993, our products have been used in demanding installations worldwide. These include radio and television stations, theaters and opera houses, government and other public buildings. Every installation is unique.

We have set ourselves the ambitious goal of supporting our customers worldwide in successfully mastering their challenges and provide individual support with long-term personal customer loyalty. Our company has grown continuously and currently employs 50 people at our Berlin-Köpenick location.

Are you enthusiastic about good sound and electronics? Then let us shape the future of digital audio and mixing console technology together and become part of our team as

Inspection and test engineer (m/f/d)

Location

- Our company headquarters in Berlin-Köpenick

Position

- Full time, 40h/week
- Flexitime in coordination with colleagues
- Start at the next possible date

What you will do

Take responsibility for:

- Commissioning, troubleshooting and comprehensive quality control with measurement reports of audio assemblies
- Development and programming of measuring systems for automatic measuring and testing procedures including documentation in a SQL database
- Measurements accompanying development and consulting of the development department

Your profile

You are exactly the right person for this position if you are enthusiastic about digital audio technology and willing to learn about new, cross-topic tasks.

- You have many years of experience and sound knowledge in audio engineering and measurement technology.
- You can independently determine and perform suitable audio measurement procedures and interpret the results. Subsequently, you are able to deduce the causes from insufficient measurement results
- You have a basic understanding of electronic components, circuit diagrams and hardware layout
- You work solution-oriented, are a team player and communicative
- You have a good knowledge of German and English

Desirable:

- Programming knowledge of an object-oriented high-level language

We offer:

- Independent work with varied tasks
- High freedom of action and design
- Flat hierarchies and short decision-making paths
- Flexible working hours, compatibility of family and career
- A pleasant working atmosphere
- Individual further training opportunities
- A workplace equipped with modern IT in the new building
- Modern premises with free parking and free drinks
